Farmington, NM 87499

Gentlemen:

We are currently in the process of updating our files concerning water disposal wells. We have found many well files to be deficient in the proper authorizations and information necessary to comply with the standards outlined in NTL-2B. Upon review of your disposal well, No. 2 Pot Mesa located 1785' FNL and 2175' FEL, sec. 10, T. 20 N., R. 6 W., lease No. NM-24964, it has been found that the following information is not on file.

1. We do not have an NTL-2B on file for your No. 1 Zia. This well is located on BLM surface, with New Mexico State Minerals. Disposal of produced water is into a Federal well, therefore, requiring a NTL-2B for this produced water.
2. The well No. 1 Zia is located off-lease and produces water disposed of into the No. 2 Pot Mesa injection well. Because off-lease water is disposed of, the No. 2 Pot Mesa injection is required to have a right-of-way grant. Please contact this office for the appropriate right-of-way application.

Please supply our office with the necessary information listed above by March 30, 1988. If you have any questions, contact Ilyse Ferraiuolo at (505) 327-5344.

Sincerely,

*Arlan D. Henner*
