13. Describe Proposed or completed Operations (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)*

Merrion Oil & Gas had proposed to complete the plugging and abandonment of the subject well by October 5, 2001. We propose to add Mesaverde perms and fracture stimulate the zone to assure that there is no further potential in the wellbore prior to plugging. Proposed perms are as follows: 1774' - 80', 1803' - 07', 1815' - 19', 1822' - 32', 1864' - 74', 1888' - 96'. Total 48 holes.
