Dear Dr. Dunn:

Gas-Oil Ratio test report for subject well indicates a ratio of 12,221 cubic feet per barrel. The pool rules established by Order R-2267 classifies a well with a ratio less than 30,000 cubic feet per barrel as an oil well.

Please submit Form C-128 in triplicate to indicate which 80 acre tract is to be dedicated to subject well as an oil well. Forms are enclosed for your convenience.

Yours very truly,

A. R. Kendrick
Engineer, District #3

Dear Dr. Dunn:

Has-011 Ratio test report for subject well indicates a ratio of 12,321 cubic feet per barrel. The pool rules established by Order R-2267 classify a well with a ratio less than 30,000 cubic feet per barrel as an oil well.

Please submit form O-128 in triplicate to indicate which 80 acre tract is to be dedicated to subject well as an oil well. Forms are enclosed for your convenience.

Yours very truly,

A. R. Kendrick
Engineer, District #3
