(Note: Report results of multiple completion on Well Completion or Recompletion Report and Log form.)

13. Describe Proposed or Completed Operations (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)*

While attempting to return this well to production, the casing was found to be parted at 1698'. Attempts to recover a retrievable bridge plug at 5098' were unsuccessful and the plug will be left in the hole. Plan to plug well as follows by verbal approval from Steve Mason, 2-15-94:

1. Spot 50' Class B cement plug on top of bridge plug @ 5098'.
2. Spot 100' Class B cement plug across Mesa Verde top @ 3532'.
3. Spot Class B cement plug from 1321' to 2018' to cover Pictured Cliffs, Fruitland, and Ojo Alamo tops, plug the parted casing at 1698'.
4. Spot surface plug 0' to 420' with Class B cement.
5. Attempt to pump down bradenhead. If rate can be established, fill with cement.

14. I hereby certify that the foregoing is true and correct
