DEC 17 1982

(NOTE: Report results of multiple completion or zone change on Form 9-330.)

U. S. GEOLOGICAL SURVEY  
FARMINGTON, N. M.

17. DESCRIBE PROPOSED OR COMPLETED OPERATIONS (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)\*

Grace Petroleum proposes to lay a 2" welded steel gas flowline from the Benn #1 well in SENE Section 9, T23N-R7W, Rio Arriba County, NM, to the Vandenburg Compressor in SWSW Section 11, T23N-R7W. This line will be laid approximately 5 feet from the existing 2" line which also serves five other wells. The new line is necessary to adequately handle all produced gas and to aid allocation of production. A right-of-way covering both lines has been applied for with the BLM. Work will commence after receipt of all necessary approvals.

*Approved subject to receipt of approved rights-of-way from the BLM. Also gas from this lease must be measured before commingling with gas from other leases!*
