Pursuant to your letter dated March 21, 1991 (received March 25, 1991), Merrion Oil and Gas requests permission not to perform a casing integrity test on the subject well. First, the well has given no previous indication it has a casing leak. Second, a cement bond log indicated that the top of cement is $\pm 250'$, which is above the Ojo Alamo Formation. And third, Merrion plans to connect the well to a gas pipeline this summer and get the well on production.
