13. Describe Proposed or Completed Operations (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)*

A pressure gradient has indicated no fluid in the hole and fillup in the bottom of the hole, so it will be necessary to cleanout to the original TD, 4274 ft., before the well can be tested. Then, a four point test will be conducted, testing the well for one day each at four different orifice settings, as specified by the Aztec District of the OCD.
