3162.3-2 (7100)

Questar will attempt to return the subject well to production by testing the tubing for leaks and possibly treating it with acid to clean up any scale on the perforations. In the event the well is still uneconomic after the tubing is tested and the well is acidized, the plan will be to plug and abandon.

Contingent on rig availability, Questar plans to do this work sometime in the 2nd quarter of this year.

14. I hereby certify that the foregoing is true and correct
