DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

We expect to top the Moss Verde sand at a maximum of 1550 feet using rotary core drill, drilling 7 3/8" hole. If oil is found will set 4 1/2" casing to top of producing sand. Will core when necessary and run an electric log. If production is obtained will cement casing to top of sand. Will set one length of 8 5/8" surface casing and circulate and cement to set properly.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
