ABANDONMENT*

(NOTE: Report results of multiple completion on Well Completion or Recompletion Report and Log form.)

17. DESCRIBE PROPOSED OR COMPLETED OPERATIONS (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)*

Perforate with 2 shots per foot:
4704-15; 4762-73; 4812-15Test each of the above three separate intervals by use of bridge plug and packer.
If necessary zones will be broken down with acid to test.Assuming commercial productive zones not found:Set E-Z drill at 4600' and squeeze open perforations from 4634 thru 4815.
4 1/2" bridge plug will then be cemented in place which is covering perforations from 4918-30.

Perforate at approximately 4000' with two shots and try to squeeze cement over Gallup formation. Subsequent notice to complete Gallup will be furnished if squeeze successful.

Assuming commercial productive zones found:

If one or all of the above zones from 4704 to 4815 is determined to be capable of commercial production perforations from 4634-42 and any of the other perforated zones thru 4890 not considered to be commercial will be squeezed off. Zone considered to be of commercial quantity will then be placed in operation.

18. I hereby certify that the foregoing is true and correct
