N. E. Haynes
Well No. 5 is located 1606 ft. from N line and 928 ft. from E line of sec. 22
NW/4 Sec. 22 T24N R5W NMPM
(1/4 Sec. and Sec. No.) (Twp.) (Range) (Meridian)
Basin Dakota Rio Arriba County New Mexico
(Field) (County or Subdivision) (State or Territory)

The elevation of the derrick floor above sea level is 6706 ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

We propose to drill this well with rotary tools to an estimated depth of 6850' to test the Dakota formation. Approximately 300' of 8 5/8" surface casing will be run & cemented to surface. If commercial production is encountered, the well will be completed following running 5 1/2" production casing and cementing as follows: the Dakota & Gallup formation will be cemented through the casing shoe and the Mesa Verde & Pictured Cliffs formations will be cemented through a stage collar at approximately 4700'.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
