Dear Mr. Arnold:

The Gallup zone of Redfern & Herd's Largo Spur #1 located in J-18-24N-6W was logged off during the Packer Leakage Test, and we were unable to produce it. We are requesting permission to cancel the Packer Leakage Test previously scheduled and obtain permission to produce the Gallup zone for seven days to clean it up and get it into producing condition so that a Packer Leakage Test may be scheduled at a later date.

Very truly yours,

 Thomas A. Dugan
