Well Bond; NE/4 SE/4 SE/4 Sec. 1,
T-24-N, R-2-W; U. S. Fidelity &
Guaranty Company

Dear Sir:

The Commission this date approves the above-captioned one-well bond to cover the well formerly owned and operated by Greenbrier Oil Company in Section 1, Township 24 North, Range 2 West.

We are forwarding your Notice of Change of Ownership on this well to our Artes Office for approval since the well lies in Rio Arriba County which is under the jurisdiction of our District 3 Office.

Therefore, inasmuch as you have complied with all of our regulations pertaining to the transfer of ownership, Greenbrier Oil Company is hereby relieved of any further responsibility in connection with this well.

Very truly yours,

W. B. Macey
Secretary - Director

the β phase of the polymer. The β phase is the more ordered phase and is characterized by a higher density than the α phase. The β phase is also the more stable phase and is the one that is observed in the crystalline state of the polymer. The α phase is the less ordered phase and is characterized by a lower density than the β phase. The α phase is also the less stable phase and is the one that is observed in the amorphous state of the polymer.

1. The first step in the process of the investigation is to identify the problem. This is done by the investigator who is responsible for the investigation. The investigator will identify the problem and then will determine the scope of the investigation. The investigator will then determine the objectives of the investigation and will then determine the methods of the investigation. The investigator will then determine the results of the investigation and will then determine the conclusions of the investigation. The investigator will then determine the recommendations of the investigation and will then determine the actions of the investigation. The investigator will then determine the follow-up of the investigation and will then determine the final report of the investigation.
