1000 Rio Brazos Road  
Aztec, New Mexico

Attention: Mr. Emery C. Arnold,  
Supervisor, District #3

Gentlemen:

Your letter of April 23, 1958 stated that we had failed to file an initial deliverability test form on our Bolack "B" #2, which is located in Unit K - Section 1-24N-6W, Rio Arriba County, New Mexico. On February 12, 1958 I transmitted form C-122A in triplicate reporting the annual deliverability test for the subject well. This test had been conducted from January 1, through January 15, 1958. As our Bolack "B" #2 was connected to the El Paso Natural Gas Company pipeline on November 22, 1957 and the initial gas sale on December 13, 1957, would it be possible to utilize the previously mentioned C-122A for the initial deliverability test?

It would be appreciated if you would inform me at your convenience whether another form must be submitted reporting the initial deliverability test or whether our previous submittal will be sufficient. In addition, I would appreciate your advising me whether future annual deliverability tests of Bolack "B" #2 will be required. As this well had a deliverability of approximately 32 Mcf/day we desire to dispense with any further potential tests in accordance with Rule 401. Shut-in pressures of the subject well, however, would be reported on an annual basis.

Very truly yours,

N. B. GOVE
