Benson-Montin-Greer Drilling Corporation  
221 Petroleum Center Building  
Farmington, NM 87401

Gentlemen:

A review of our files concerning your well No. 1 Federal 17-32, Federal lease NM-40684, Rio Arriba County, New Mexico, shows that the well was shut-in during August 1987. Since this lease is in its extended term by production, it must contain a well capable of producing hydrocarbons in paying quantities, i.e., sufficient quantities to pay the day-to-day operating and lease maintenance costs, or it will be considered to have expired.

In the absence of an acceptable showing by you that the subject well is capable of producing leasehold substances in paying quantities, within sixty (60) days from the receipt of this notice, this office will consider the lease to have terminated by operation of law effective August 31, 1987.

If you consider the well incapable of production in paying quantities, the subject lease will terminate and you should make plans to plug and abandon the wells.

The foregoing information is furnished so that you may take such action as you consider appropriate. You are further reminded that no production tests or other operations should be conducted on the lease without prior approval by this office.

Sincerely,

*James E. Edwards Jr.*  
Ron Fellows  
Area Manager
