If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)\*

The original application to plug back this well was approved 10-12-78 to plug back and complete in the Chacra and Pictured Cliffs formation and commingle production down hole.

We now propose to plug back and complete in the Pictured Cliffs zone only as follows:

1. Set cement retainer at  $\pm$  5900' and squeeze Gallup. Perfs at 5948'-6064'.
2. Set cast-iron bridge plug at 2800', dump 50' of cement on top of plug filling up to 2750', to shut off Mesaverde formation to prevent casing leaks.
3. Perforate Pictured Cliffs formation from 2655'-65' and complete as a single zone.

18. I hereby certify that the foregoing is true and correct
