Gentlemen:

Please consider this letter as Skelly Oil Company's application to dual complete its Jicarilla "C" Well No. 15 and in support thereof provides as follows:

1. That the applicant is the operator of this lease which contains 2560 acres and is described as the S/2 Section 21 and S/2 Section 22; all of Section 27 and 28; N/2 Section 33 and N/2 of Section 34, all in Township 25 North and Range 5 West, Rio Arriba County.

2. That the applicant's Jicarilla "C" Well No. 15 is located 1650' from the north and east lines of Section 34, Township 25 North, Range 5 West, Rio Arriba County, New Mexico.

3. That the applicant dually completed the well in the following manner:

- a. Perforated 5-1/2" casing from 2886' to 2910' in the Pictured Cliffs.
- b. Perforated 5-1/2" casing from 3726' to 3775' in the Lewis Sand.
- c. Set Baker production type packer at 3648'. Landing nipple was set on top of production packer at 3647' with side door choke set in landing nipple, so the Pictured Cliffs can be produced through the annulus of the 5-1/2" casing and the Lewis Sand is produced through 2" tubing.

6. That a diagramatic sketch showing the producing intervals and the physical equipment used in dualling the well is attached.

7. That a plat showing the above described lands and all offset properties, indicating well locations and lease ownership to the best of our knowledge is attached.

8. That all offset operators are hereby notified by a copy of this application.
