Re; Application to Dually Complete
Amerada Jicarilla Apache "A"
No. 4, Rio Arriba County, N.M.

Gentlemen:

By this letter of application Amerada Petroleum Corporation wishes to state the following:

- (A) That Amerada Petroleum Corporation Jicarilla Apache "A" No. 4 is located 990 ft. FSL and 990 ft. FEL of Section 26, Township 25 North, Range 5 West, Rio Arriba County, New Mexico. The attached Exhibit A shows the location of this well together with the location of all offset wells.
- (B) That the subject well has 5½" casing set at 3989 ft. and cemented with 350 sacks of cement.
- (C) That the applicant dually completed the well in the following manner:
 - (1) Perforated the 5½" casing in the intervals from 3057 ft. to 3070 ft. and 3104 ft. and 3113 ft. in the Pictured Cliff zone.
 - (2) Perforated the 5½" casing in the interval from 3926 ft. to 3946 ft. in the La Ventana zone.
 - (3) Set production type packer between these two zones at 3900 ft. for separation.
 - (4) Produced the La Ventana gas through the tubing and the Pictured Cliff gas through the tubing-casing annulus. The attached Exhibit B is a diagrammatic sketch of the dual completion.

- (D) That the granting of this application to produce this well as a dual completion with gas from the La Ventana and gas from the Pictured Cliff is in the interest of conservation and the protection of correlative rights.
- (E) That the applicant will comply with all the rules and regulations of the New Mexico Oil Conservation Commission to maintain separation of production from the two pay zones.
- (F) That the manner and method of this dual completion is mechanically feasible and practical.
- (G) That by copy of this letter of application by registered mail all offset operators are notified of this dual completion.

Therefore, Amerada Petroleum Corporation requests that the Oil Conservation Commission grant permission to produce the subject well as a dual completion as proposed in the application.

Respectfully submitted,

AMERADA PETROLEUM CORPORATION

The first part of the document discusses the importance of maintaining accurate records of all transactions. This is essential for ensuring the integrity of the financial data and for providing a clear audit trail. The second part of the document outlines the procedures for handling discrepancies and resolving them in a timely manner.

The third part of the document describes the various methods used to collect and analyze data. This includes both qualitative and quantitative techniques, as well as the use of statistical software to process large datasets. The fourth part of the document discusses the importance of data security and the measures taken to protect sensitive information.

The fifth part of the document outlines the procedures for data backup and recovery. This is a critical component of any data management system, as it ensures that data can be restored in the event of a disaster. The sixth part of the document discusses the importance of data archiving and the measures taken to ensure that data is preserved for the long term.

The seventh part of the document describes the various methods used to monitor and control data. This includes the use of data mining techniques to identify patterns and trends, as well as the use of data visualization tools to present data in a clear and concise manner. The eighth part of the document discusses the importance of data governance and the measures taken to ensure that data is managed in a responsible and ethical manner.

The ninth part of the document outlines the procedures for data retention and disposal. This is a critical component of any data management system, as it ensures that data is kept for the appropriate amount of time and is disposed of in a secure and compliant manner. The tenth part of the document discusses the importance of data privacy and the measures taken to protect personal information.

The eleventh part of the document describes the various methods used to ensure data quality. This includes the use of data validation techniques to check for errors and inconsistencies, as well as the use of data cleansing techniques to remove unwanted data. The twelfth part of the document discusses the importance of data documentation and the measures taken to ensure that data is properly labeled and described.

The thirteenth part of the document outlines the procedures for data access and control. This is a critical component of any data management system, as it ensures that data is only accessible to authorized personnel and that access is controlled in a secure and compliant manner. The fourteenth part of the document discusses the importance of data backup and recovery.

The fifteenth part of the document describes the various methods used to monitor and control data. This includes the use of data mining techniques to identify patterns and trends, as well as the use of data visualization tools to present data in a clear and concise manner. The sixteenth part of the document discusses the importance of data governance and the measures taken to ensure that data is managed in a responsible and ethical manner.

The seventeenth part of the document outlines the procedures for data retention and disposal. This is a critical component of any data management system, as it ensures that data is kept for the appropriate amount of time and is disposed of in a secure and compliant manner. The eighteenth part of the document discusses the importance of data privacy and the measures taken to protect personal information.

The nineteenth part of the document describes the various methods used to ensure data quality. This includes the use of data validation techniques to check for errors and inconsistencies, as well as the use of data cleansing techniques to remove unwanted data. The twentieth part of the document discusses the importance of data documentation and the measures taken to ensure that data is properly labeled and described.

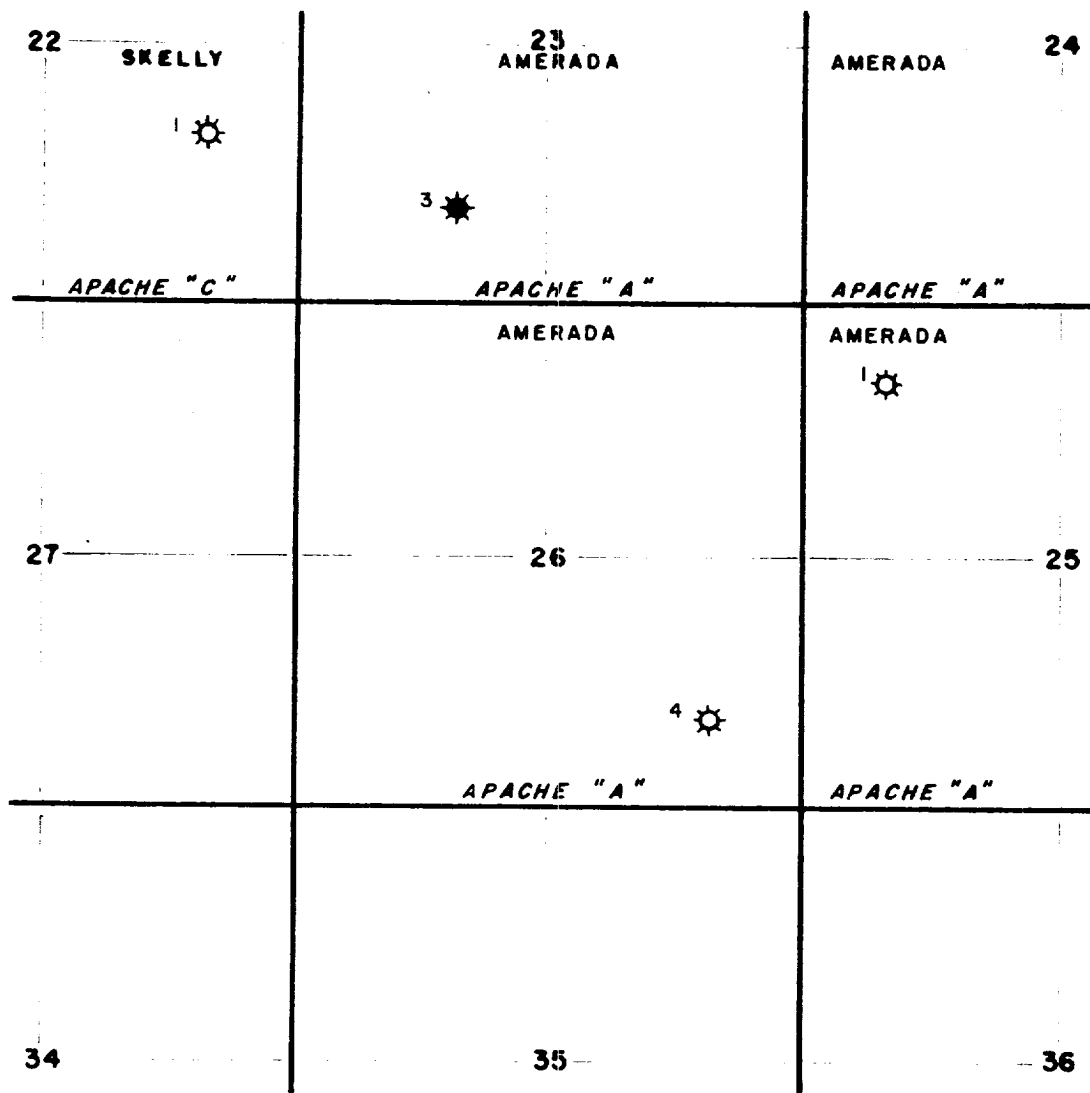

The twenty-first part of the document outlines the procedures for data access and control. This is a critical component of any data management system, as it ensures that data is only accessible to authorized personnel and that access is controlled in a secure and compliant manner. The twenty-second part of the document discusses the importance of data backup and recovery.

The twenty-third part of the document describes the various methods used to monitor and control data. This includes the use of data mining techniques to identify patterns and trends, as well as the use of data visualization tools to present data in a clear and concise manner. The twenty-fourth part of the document discusses the importance of data governance and the measures taken to ensure that data is managed in a responsible and ethical manner.

The twenty-fifth part of the document outlines the procedures for data retention and disposal. This is a critical component of any data management system, as it ensures that data is kept for the appropriate amount of time and is disposed of in a secure and compliant manner. The twenty-sixth part of the document discusses the importance of data privacy and the measures taken to protect personal information.

The twenty-seventh part of the document describes the various methods used to ensure data quality. This includes the use of data validation techniques to check for errors and inconsistencies, as well as the use of data cleansing techniques to remove unwanted data. The twenty-eighth part of the document discusses the importance of data documentation and the measures taken to ensure that data is properly labeled and described.

The twenty-ninth part of the document outlines the procedures for data access and control. This is a critical component of any data management system, as it ensures that data is only accessible to authorized personnel and that access is controlled in a secure and compliant manner. The thirtieth part of the document discusses the importance of data backup and recovery.
