Mr. Dan Furse Amerada Petroleum Corporation Durango, Colorado

Re: Jicarilla Apache "A" #4
P-26-25N-5W

Dear Dan:

The 1965 annual deliverability test reports for subject well as supplied by El Paso's machine section do not agree on the setting depth of the 5% casing.

The casing depth does not enter into the test calculations.

Please initiate a correction for the Pictured Cliffs casing depth to avoid confusion of this well with those wells which have parellel strings of casing.

The setting depth should be 3981 feet for both zones.

If questions arise, please contact us.

Yours very truly

A. R. Kendrick Engineer, District #3
