DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

We propose to drill this well with rotary tools to an estimated depth of **700'** to test the **Sabota** and **Gallup** formations. Approximately **200'** of **10 1/4"** surface casing will be run and cemented and if commercial production is found a string of **7"** production casing will be run and cemented with a stage collar at approximately **100'** and the well completed.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
