1. The first group of respondents (n = 10) was asked to identify the most important factors influencing their decision to use a mobile app. The factors identified were: ease of use, reliability, security, and privacy. The second group (n = 10) was asked to identify the most important factors influencing their decision to use a mobile app. The factors identified were: ease of use, reliability, security, and privacy. The third group (n = 10) was asked to identify the most important factors influencing their decision to use a mobile app. The factors identified were: ease of use, reliability, security, and privacy.
