DETAILS OF WORK

(State names of and expected results to object to be shown, sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing jobs, and all other important proposed work)

Due to non-commercial production, it is intended to plug and abandon this well in the following manner:

1. Spot a 20 sack cement plug across perforations 3496-3504; 3532-3548' by pumping cement plug down with a rubber plug or by cable tools.
2. Determine 5 1/2" casing free point and cut casing.
3. Spot a 20 sack cement plug across cut off and pull casing.
4. Spot a 10 sack cement plug with a 4' x 4" permanent dry hole marker in top of surface.

I understand that this plan of work must receive approval in writing by the Geological Survey before work may be commenced.
