NOTICE OF INTENTION TO PULL OR ALTER CASING	SUPPLEMENTARY WELL HISTORY	
NOTICE OF INTENTION TO ABANDON WELL Plug back and recomplate		U. S. GEOLOGICAL SURVEY FARMINGTON, NEW MEXICO

(INDICATE ABOVE BY CHECK MARK NATURE OF REPORT, NOTICE, OR OTHER DATA)

August 22, 1960, 19

Sanilla "C"
Well No. **17** is located **1190** ft. from **N** line and **1190** ft. from **E** line of sec. **28**
N 1/4 Section 28 **28** **34** **N 1/4**
(1/4 Sec. and Sec. No.) (Twp.) (Range) (Meridian)
Blanco Mesa Verde **Rio Arriba** **New Mexico**
(Field) (County or Subdivision) (State or Territory)

The elevation of the derrick floor above sea level is _____ ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudlogging jobs, cementing points, and all other important proposed work)

Since completion of the **Monofee** section of the **Mesa Verde** formation in this well, the gas has decreased and the water has increased to the point where it is impossible to keep the well producing into the line.

It is our intention to squeeze off the **Monofee** perforations, plug back, and dual complete the well in the **Chaco** and **Pictured Cliffs** formations.

Our program will be as follows:

Squeeze perforations **4690-4718'**, **4729-4740'**, **4744-4768'** and **4769-4772'** with 100 sacks cement.

Perforate and free **Chaco** formation.

Set Baker Model "B" production packer.

Perforate and free **Pictured Cliffs** formation.

Set 2" EHL tubing through production packer to produce **Chaco** gas.

Pictured Cliff gas to be produced through tubing casing annulus.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.

Company **Shelly Oil Company**

Address **Drawer 310**

Farmington, New Mexico
