Rio Arriba County
(County or Subdivision)

New Mexico
(State or Territory)

The elevation of the derrick floor above sea level is 7314 ft. (Est. R.B.M. 11')

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

We propose to drill this well with rotary tools to an estimated depth of 6765' to test the Gallup formation. Approximately 120' of 1 3/8" surface casing will be run and cemented and if commercial production is found, a string of 5 1/2" production casing will be run and cemented and the well completed.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
