Farmington, New Mexico March 26, 1956

Mescalito Contract 148
Well No. 8 is located 1490 ft. from N line and 1490 ft. from W line of sec. 29
NE 1/4 of Section 29 T-25-N R-3-E MEW
(1/4 Sec. and Sec. No.) (Twp.) (Range) (Meridian)
South Blanco-Piedra Rio Arriba New Mexico
(Field) (County or Subdivision) (State or Territory)

The elevation of the ground level above sea level is 6096 ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

On February 29, 1956, this well was spudded and on March 1, 1956, 6-5/8" casing was landed at 167 feet and cemented with 80 sacks cement. After waiting on cement for 24 hours, casing and water shut off were tested with 900 pounds for 30 minutes with no drop in pressure. Drilling operations were resumed.

On March 10, 1956, 5-1/2" casing was landed at 3020 feet and cemented with 100 sacks cement. After waiting on cement for 24 hours, casing and water shut off were tested with 1000 pounds for 30 minutes with no drop in pressure. Completion operations were resumed.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
