The elevation of the derrick floor above sea level is **6870** ft. **Est.**

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

Propose to drill well to Pictured Cliffs formation, or 2875', or production, whichever is the lesser.

Propose to set approximately 175' of 9-5/8" casing with cement circulate to surface.

Propose to cement 7" casing through or on top of producing zone if production is encountered.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
