

NEW MEXICO OIL CONSERVATION COMMISSION
Santa Fe, New Mexico

(Form C-104)
Revised 7/1/57

REQUEST FOR (GAS) ALLOWABLE

New Well
Recompletion

This form shall be submitted by the operator before an initial allowable will be assigned to any completed Oil or Gas well. Form C-104 is to be submitted in QUADRUPPLICATE to the same District Office to which Form C-101 was sent. The allowable will be assigned effective 7:00 A.M. on date of completion or recompletion, provided this form is filed during calendar month of completion or recompletion. The completion date shall be that date in the case of an oil well when new oil is delivered into the stock tanks. Gas must be reported on 15.025 psia at 60° Fahrenheit.

[Faint, illegible handwritten notes]

1. The first group of people who are not in the labor force are those who are not in the labor force because they are not in the labor force. This group is the largest group of people who are not in the labor force.

1. The first group of authors (e.g., [1, 2]) has shown that the use of a single, common, and simple model for all the components of the system is not only possible but also convenient. This approach is based on the assumption that the system components are homogeneous and that the system is in a steady state. The main advantage of this approach is its simplicity and the fact that it does not require a large amount of data. The main disadvantage is that it does not take into account the heterogeneity of the system components and the non-steady state of the system.

[illegible]
$$f(x) = \frac{1}{2} \left(\frac{1}{x} + \frac{1}{x^2} \right) \quad \text{for } x \in \mathbb{R} \setminus \{0\}$$

100-443887-100

1. The first part of the document is a list of names and addresses, which appears to be a directory or a list of contacts. The names are written in a cursive script, and the addresses are listed below them. The list includes names such as "John Doe", "Jane Smith", and "Robert Johnson", along with their respective addresses.
