1. The first step in the process of the proposed legislation is the identification of the problem to be addressed. This is followed by the development of a bill, which is then introduced into the House of Representatives. The bill is then assigned to a committee, which holds hearings and gathers input from stakeholders. The committee then reports the bill back to the House, where it is debated and voted on. If the bill passes the House, it moves to the Senate, where a similar process occurs. If the bill passes the Senate, it is sent to the President for signature. If the President vetoes the bill, it can be overridden by a two-thirds majority in both the House and the Senate.
