DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

Hicarilla Contract 148 Well No. 11 was spudded on January 7, 1959, and on January 8, 1959, 8-1/8" casing was set at 216' with 140 sacks of cement. After waiting on cement, casing and water shut-off were tested with 400 pounds pressure for 30 minutes, which held with no drop in pressure. Reduced hole to 7-7/8" at 216' and resumed drilling operations.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
