RE: M.I.T.'s on the following wells:

30-039-20352, Canada Ojitos Ut #17, G-01-24N-01W
30-039-20426, Canada Ojitos Ut #19, A-14-24N-01W
30-039-20372, Canada Ojitos Ut #18, C-04-25N-01E
30-039-06026, Canada Ojitos Ut #5, B-18-25N-01E
30-039-05997, Canada Ojitos Ut #2, K-13-25N-01W
30-045-20356, La Plata Mancos #4, N-31-32N-13W

Dear Al:

The NMOCD, as part of its Underground Injection Authority, requires Benson-Montin-Greer Drilling Corporation perform an M.I.T. on the injection wells listed above once every five years. M.I.T.'s are due on these wells on or before August 28, 1995.

The mechanical integrity of casing tubing annulus is tested by submitting the annulus to a pressure of 300 psi for 30 minutes with less than 10% bleed-off occurring, as outlined in Rule #704 of the New Mexico Rules & Regulations Manual.

The NMOCD requires a 24-48 hour notice so that we may be present to witness testing. All testing schedules should be coordinated through either Mr. Johnny Robinson or myself at 505-334-6178.

Benson-Montin-Greer Drilling Corporation should also furnish any necessary personnel and equipment needed to contact the previously mentioned M.I.T. tests. If there are any questions please feel free to contact this office.

Sincerely,

Ernest Cardona
Deputy O&G Inspector
