October 31, 1957

Well No. 1 is located 990 ft. from N line and 1650 ft. from EX line of sec. 13

NE 1/4 Section 13 25N 3W H. M. E. N.  
(1/4 Sec. and Sec. No.) (Twp.) (Range) (Meridian)

Undesignated (Mesa Verde) Sio Arriba New Mexico  
(Field) (County or Subdivision) (State or Territory)

The elevation of the derrick floor above sea level is 7324 ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

It is our intention to deepen Well No. 1 to a depth around 6200' to test the Mesa Verde formation. This well was drilled to 3889' and tested the Pictured Cliffs formation which did not produce gas or oil.

Our casing program will be to set 5' OD casing, 15' liner at 3775' in 7" casing with Burns plain type grooved Hanger and cemented with 300 lbs. cement.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
