After failing to find commercial production, Amoco plans to abandon the Mesaverde Menefee Formation as follows:

1. Set a fullbore packer at about 4520'.
2. Pressure annulus to 1000 psig and squeeze below packer with 100 sacks Class "A" Neat cement.
3. Wait on cement to set and then pull packer.

We plan to evaluate other prospective pay zones in the well for completion at a later date.
