Royal Development Company
Box 1299
Albuquerque, New Mexico

Attn: Mr. J. Bauman

Dear Sir:

We have received amended C-115, Production Report, pertaining to the Royal Development Company #1 Royal Harvey well located in Section 10-25N-1E.

In checking your oil and water production and correlating this information with the storage report we have determined that you are including water production in the "Actual Barrels Produced" column and then deducting out the water production in calculating storage. The "Actual Barrels Produced" column should show only actual oil produced. For example: On your November, 1964 report the actual barrels produced should be 8 barrels rather than 25 barrels, the water produced 17 barrels as shown and your storage should be correct as shown.

this

We could make/correction but as the form has been distributed to other offices and as there is a possibility that your legal storage record will be calculated in error by our Santa Fe Office because of this discrepancy, I believe that you should refile these forms, making the proper corrections.. We are, therefore, returning the forms which you have submitted.

Yours very truly

Emery C. Arnold

AZTEC, NEW MEXICO

Nov 17, 1962

Royal Development Company
Box 1209
Albuquerque, New Mexico

Attn: Mr. J. Barker

Dear Sir:

We have received amended 2-12, Production Report, pertaining to
the Royal Development Company #1 Royal Harvey well located in
Section 12-24-12.

In checking your report, water production and water status
information with the storage report was not detailed. Your report
including water production in the Royal Harvey Production Report
and then deducting the water production in calculating storage.
The actual barrels produced should show over actual oil
produced. For example: In your December, 1961 report the actual
barrels produced should be 8 barrels rather than 25 barrels, the
water produced 17 barrels as shown and your storage should be correct
as shown.

We would make correction on it as the form has been distributed to
other offices and as there is a possibility that your January storage
report will be calculated in error by our Santa Fe Office because of
this discrepancy, I believe that you should refile these forms, making
the proper corrections. We are, therefore, returning the forms which
you have submitted.

Yours very truly
