Attn: Mr. William C. Russell

Re: R & G Drilling Co. #1-13 Davis
K-1-25N-34

Dear Bill:

The above well was completed August 21, 1956 at a total depth of 3900' with 5 $\frac{1}{2}$ " casing cemented at 3900' with 200 sacks. An initial potential of 500 MFPD was reported.

In previous correspondence with you you have indicated that the well would be plugged and abandoned; however we have never received a notice of intention to plug or Form C-103 showing results of plugging.

Unless we receive some information which would change the situation it is our intention to set the matter for hearing before the Oil Conservation Commission in Santa Fe to have the operator and bonding company show cause why the well should not be properly plugged and abandoned.

Will you please indicate what your plans are for the above well.

Yours very truly

Emery C. Arnold
Supervisor, District #3
