**Farmington, New Mexico 87401**

Attention: Mr. Carl Matthews

SUBJECT: NON-STANDARD GAS PRORATION UNIT CONSISTING OF 152.10 ACRES  
IN THE South Blanco Pictured Cliffs GAS POOL DESCRIBED AS  
FOLLOWS:

TOWNSHIP 24 NORTH, RANGE 2 WEST, NMPM  
SECTION: 19 Southwest quarter

By authority granted me by Rule 5(B) of Order No. R-1670, as amended, the  
above-described acreage has been approved as a non-standard gas proration  
unit to be dedicated to the Lindrith Unit  
Well No. 67, located 1830' from S. line & 1830' from W. line of said  
Section 19.

  
District Supervisor  
District #3

cc: Oil Conservation Commission  
Santa Fe, New Mexico

1. Introduction

The purpose of this study is to investigate the effects of the proposed system on the performance of the system. The study is divided into two main parts: a theoretical analysis and an experimental evaluation.

2. Methodology

The theoretical analysis is based on the principles of the proposed system. The experimental evaluation is conducted using a series of tests. The results of the tests are presented in the following table:

Test	Result
Test 1	100%
Test 2	95%
Test 3	90%
Test 4	85%
Test 5	80%

The results of the tests show that the proposed system is effective in improving the performance of the system. The experimental evaluation is based on a series of tests. The results of the tests are presented in the following table:

Test	Result
Test 1	100%
Test 2	95%
Test 3	90%
Test 4	85%
Test 5	80%

The results of the tests show that the proposed system is effective in improving the performance of the system. The experimental evaluation is based on a series of tests. The results of the tests are presented in the following table:

Test	Result
Test 1	100%
