17. DESCRIBE PROPOSED OR COMPLETED OPERATIONS (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)\*

Recent testing of this well showed current production of 350 MCFD, 90 BWPD, and 8 BOPD. It has been determined that the high water production is coming from the Menefee and Cliffhouse zones. Therefore, it is proposed to squeeze off the perforations opposite the Menefee and Cliffhouse zones to shut off the excessive water production.
