13. Describe Proposed or Completed Operation (clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recomplete horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports shall be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompletion in a new interval, a Form 3160-4 shall be filed once testing has been completed. Final Abandonment Notices shall be filed only after all requirements, including reclamation, have been completed, and the operator has determined that the site is ready for final inspection.)

Conoco proposes to temporarily plug and abandon this well to a depth of +/-6200'. In doing so, this will protect all uphole formations from being in communication with the current Gallup/Dakota completion. This will provide Conoco time to determine the cause of the underperforming Gallup/Dakota completion and allow us to evaluate the possible restoration of production in this well. The casing above the plug will be pressure tested for casing integrity during plug back operations. This well is also being considered as a possible saltwater disposal well. There is no history of casing problems in this well. Procedures for the abandonment will be submitted by January 15, 2001.
