17. (If side proposed or completed operations, report stage and pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)

It is proposed to run a 2-7/8" packer on 1-1/4" tubing and set at 5000' to isolate the perforations from a possible casing leak. If a casing leak is identified and if economical, the casing leak will be repaired at a future date.

March 28, 1989, is the estimated date for the proposed work.
