

J. Apache "A" #10
890'FNL, 1750'FEL
Sec.35. T25N,R5W
Rio Arriba, County,
New Mexico.

This plan is submitted with the Application for Permit to Drill the above well. The purpose of the plan is to describe the location of the proposed well, the proposed construction activities and operations plan, the magnitude of necessary surface disturbance involved and the procedures to be followed in rehabilitating the surface after completion of the operation so that a complete appraisal ;can be made of the environmental effects associated with the operation.

1. Existing Roads:

- | | |
|----------------------------|---|
| A. Plat attached. | F. Well will be approx. 700' off main road. |
| B. Plat attached with map. | No repairs will be necessary to existing |
| C. Shown on plat. | road, only grading to improve access to |
| D. Shown on topo map. | well site. |
| E. Shown on topo map. | |

2. Planned access roads:

- A. Topo map shows existing roads and that approx. 700' of new road will have to be build from main road to well site.

3. Location of existing wells:

- | | | |
|--|-----------------------|----------------------|
| A. Plat of area, shows existing and/or wells to be drilled . | | |
| 1. No water wells. | 3. No TA Wells. | 5.Location shown for |
| 2. No abandoned wells. | 4. No disposal wells. | drlg.well. for AHC |

4. Location of Existing and/or proposed facilities:

- A. Existing facilities in this area include Wells #8 and #9 which have their own batteries and flowlines.
- b. In the event of a producing well, as shown on topo map, tanks will be installed approx. 200' from well site, utilizing same pad designed and built to drill well.

5. Location and type of water supply:

- A. No water supply is available for drilling purposes. Water will be truc ked to well site and stored in pit
- B. No water well is to be drilled.

6. Source of construction materials:

No construction materials are anticipated to be needed for this well.

7. Method for handling of waste material:

- A. Drlg. cuttings will be disposed of in pits.
- B. Drlg. fluids will be allowed to evaporate in pits.
- C. Fluids produced during drlg. oper. will be put in pits.
- D. Current laws and regulations pertaining to human waste will be complied with.
- E. Garbage and other waste material will be fenced and destroyed in compliance with regulations.
- F. Location after dalling will be filled, leveled and reseeded.

8. Ancillary Facilities:

- A. No camps or airstrips are required.

9. Well site layout:

- A. See plat attached
B. See plat attached
C. See plat attached
E. Pits are to be lined.

10. Plans for restoring surface:

- A. After completion of drilling, all area will be cleaned, leveled and reseeded depending on weather conditions as soon as possible.

11. Other information:

- A. Topography: Small hilly area consisting of sandstone ledges.

B. Sagebrush, junipers and pinyons

C. None observed in area.

12. Lessee's or Operators Representative:

George M. Lambert
Amerada Hess Corporation
P.O.Box 2040 - Tulsa, Oklahoma 74102 Att'n: Drlg. Services

13. Certification:

I hereby certify that I, or persons under my direct supervision, have inspected the proposed drill site and access route. That I am familiar with the conditions that presently exist, that the statements made in this plan are the best of my knowledge true and correct, and, that the work associated with the operations ~~XXXXX~~ proposed herein will be performed by Amerada Hess Corporation and its contractors and sub-contractors in conformity with this plan and the terms and conditions under which it is approved.
