General: This form is designed for submitting a complete and correct well completion report and log on all types of holes and leases to either a Federal Agency or a State agency. It is intended for reporting information from all States and/or Federal lands. Any necessary special instructions concerning the use of this form and the number of copies to be submitted are included in the instructions which appear on each area's record procedures and practices; others are shown below or will be issued by, or may be obtained from, the local Federal office. See the Instructions on pages 29 and 30, and 32, below regarding separate reports for separate completions.

It is not the intent of the BLM that a summary record is submitted. Copies of all currently available logs, charts, maps, and core analysis, all types electric, etc., from land use and geologic surveys, should be attached hereto, to the extent required by applicable Federal and/or State laws and regulations. All attachments should be attached in this form, see item 35. Item 41. There are no applicable State requirements, locations on Federal or Indian land should be described in accordance with Federal requirements. Consult local State or Federal office for specific instructions.

Item 41: If there are no separate state requirements, locations on Federal or Indian land should be described in accordance with Federal requirements. (Consult local State or Federal office for specific instructions.)

Item 42: Report all waste operation as used in preference (where not otherwise shown) for depth measurements given in other squares on this form and in any attachments. Items 42 and 24c. If this was accomplished for separate production from more than one interval zone (multiple completion), so state in item 22, and in item 24 show the volume in each interval of intervals reported, footcords (or barrels) for only the interval reported in item 33. Submit a separate report (page) on this form, adequately identified, for each additional interval to be separately produced, showing the additional data pertinent to such interval.

Item 27: *Source's estimate?* Attaching supplemental records for this well should show the details of any multiple stage completion and the location of the cementing tool.

Item 33: Submit a separate completion report on this form for each interval to be separately produced. (See instruction for items 22 and 24 above.)

Item 13, *Intervals with comparison*, is used in preference (where not otherwise shown) for depth measurements given in other spaces on this form and in any attachments Items 42 and 43. If this were completed for separate production from more than one interval zone (multiple completion), so state in Item 22, and in Item 21 show the *Protein* and *Interval* (or *Interval*, *Protein*, *Endurance* and *Intensity*) (if any) for only the interval reported in Item 33. Submit a *separate report* (page) on this form, adequately identified, for each additional interval to be separately produced, showing the additional data pertinent to such interval.

Item 33: Submit a separate computation report on this form for each interval to be separately produced. (See instruction for Items 22 and 24 above.)
