RE: Bus Rx, Inc. Cido #2, A-16-25N-01E, Rio Arriba County New Mexico

Dear Mr. Schmidt:

While visiting the Cido #2 location on 11/20/95 the following problems were identified and need to be addressed. The well sign does not have the correct operator listed, also there may be additional information required on the well sign by BLM. The OCD requires the operator, well name, quarter quarter or unit letter and section, township and range. Open topped barrels containing crude oil need to be emptied and removed. Other chemical barrels not directly related to production need to be removed from the location. Oil contaminated soils resulting from spills and production practices may be land farmed on location or they may be moved off location for beneficial use upon request. Your request to use the materials to line a stock pond will require a test of the material for BTEX (benzene, toluene, xylene) and a TPH (total petroleum hydrocarbons), I suggest an 8015 type test for TPH. See OCD Rule 116 and guidelines for treatment of leaks and spills outlining requirements for testing when oil contamination reaches a waterway of the United States. One five point composite sample from the fifty yards mentioned will be sufficient. Results need to be less than 50 ppm BTEX and less than 100 ppm TPH for the material to be used to line a pond or tank.

If you have questions please feel free to call this office at 505-334-6178 or Roger Anderson, Chief of OCD Environmental Bureau at 505-827-7152.

Yours truly,

Denny G. Foust
Environmental Geologist

Clayton

This message is given for you to
haul the oil soaked dirt from the well
site located in T.25N, R.1E, Section 16
on your private property.

Tried to send this this morning, but it would
not go through. So I am attempting it
again this afternoon.
