Gentlemen:

I have examined the application dated 6-14-84
for the Merrin O. B. Corp. Salazar 622#1 1-22-25N6W
Operator Lease and Well No. Unit, S-T-R

and my recommendations are as follows:

Approve

Yours truly,

Ernest C. Perry

Sec. 22, T25N, R6W
Rio Arriba Co., New Mexico

Dear Mr. Chavez,

We request administrative approval to down hole commingle production from the Mesaverde and Gallup Formation of the above referenced well.

Production test on the individual formations are as follows:

Gallup	8 BOPD	Trace of Water	27 MCFGPD
Mesaverde	24 BOPD	12 BWPD (Frac Water)	75 MCFGPD

The total combined daily oil production is 32 BOPD which does not exceed the depth bracket allowable of 40 BOPD.

Both zones require artificial lift and neither zone produces more water than the oil limit stated above.

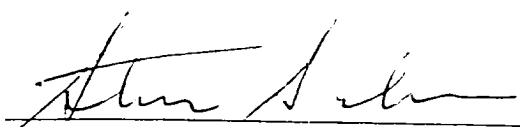

The water being produced from the Mesaverde is completion fluid water as determined by the potassium and chloride content on the attached water analysis. This water production should dissipate as production continues.

Ownership in both formations is common and the value of crude oil produced will be unaffected by commingling.

If further is required, please advise.

Yours truly,

MERRION OIL & GAS CORPORATION

Steve S. Dunn, Operations Manager

Rio Arriba Co., New Mexico

1. Allocation Formula for Production:

Current Rates:

Gallup	12 BOPD	40 MCFGD	Pumping
Mesaverde	8 BOPD	20 MCFGD	Pumping

Formula:

Gallup Allocation:	Oil	$\frac{12 \text{ BOPD}}{20 \text{ BOPD}}$	60% of total oil production
	Gas	$\frac{40 \text{ MCFGD}}{60 \text{ MCFGD}}$	67% of total gas production
Mesaverde Allocation:	Oil	$\frac{8 \text{ BOPD}}{20 \text{ BOPD}}$	40% of total oil production
	Gas	$\frac{20 \text{ MCFGD}}{60 \text{ MCFGD}}$	33% of total gas production

2. Bottomhole Pressure:

Gallup	1500 PSI	Estimated from measurements on other wells in the area.
Mesaverde	1400 - 1500 PSI	Estimated

3. Production Forecast: (Combined)

Initial Rate	20 BOPD
	60 MCFGD

Oil will decline @ 6%/month for one year to estimated 10 BOPD then continue to decline @ 1.5%/month thereafter.

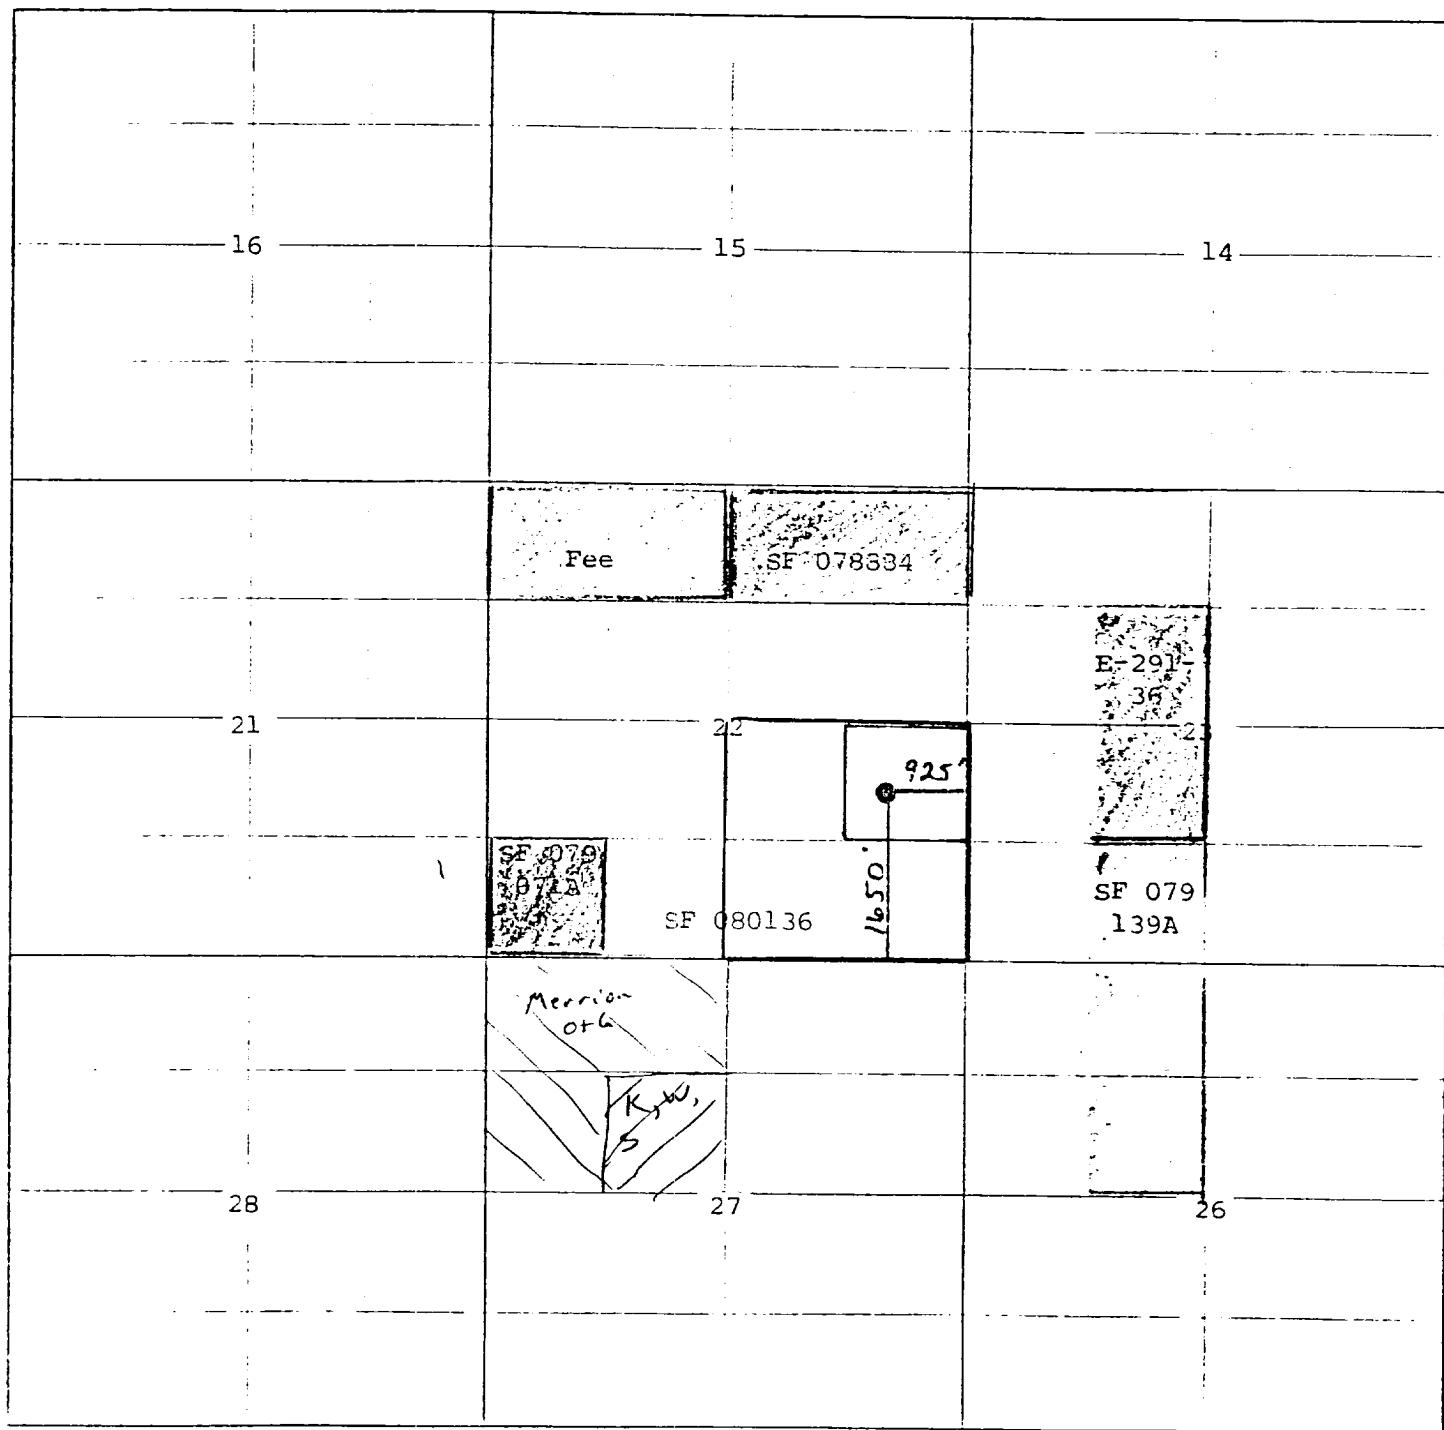

Gas will decline @ 3%/month for one year to estimated 42 MCFGD then continue to decline @ 0.75%/month thereafter.
