**Gavilan Mancos Ext./Gavilan Greenhorn-Graneros-Dakota Ext.

Upon reviewing the open hole logs and considering that the NMOCD will not permit the Mancos and Dakota production to be commingled downhole and dually producing the Mancos and Dakota is not believed to be economically feasible, we have decided to postpone completion efforts in the Dakota at this time and complete only the Mancos interval. Since the Dakota has not been perforated and was properly cemented during the primary cement job, we plan to leave the well bore open in order to facilitate future operations in the Dakota at minimal risk in jeopardizing established production in the Mancos.
