17. Describe Proposed or Completed Operations (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zone pertinent to this work) *

Mobil proposes to use the Lindrith B Unit well #37 reserve pit as a temporary storage for produced water from the Lindrith B unit wells for a period of 30 days. The water in the reserve pit will be hauled to the disposal pit when it can accommodate all of the B unit water again.

A list of Lindrith B unit wells producing water is attached. The average water production for the unit is 101 barrels per day.

The water disposal pit owned and operated by TNT Construction Company is currently operating at capacity until sprinklers are installed to enhance evaporation. TNT is anticipating sprinkler installation in April.

MEPOS, as agent for MPTH

Request by Mobil Oil for Emergency Use
of two existing reserve pits within the
Sandsith B-Unit for produced water.

Conditions for Approval:

- 1) The operator/company will contact the
fee owner, Roy Williams, regarding this
proposed action. Mr. Williams should
contact the local BLM office.
- 2) Produced water from 49 wells from within
this unit will be trucked to two reserve
pits located at the #34 & 37 Sandsith
B Unit wells.
- 3) These two reserve pits will be used by Mobil
Oil for a period of no longer than 30 days.
The operator/company will notify the local
BLM before this operation starts.
- 4) The water will be removed by Mobil Oil from
the two reserve pits starting on the 32nd day.
The operator/company will notify the local
BLM office before this operation starts.
- 5) The operator/company will conduct a complete
water and soil analysis from both reserve pits
on the 30th day of use. A copy of the com-
plete water and soil analysis will be sub-
mitted to the local BLM office.
