If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)\*

ARCO Oil & Gas Company requests permission to vent gas from the Tonkin #6 for a period up to 60 days. A GOR Test was performed on 2/23-24/87 with the following results: 13 BOPD, 1 BWPD, and 45 MCFPD. This well is presently shut-in since our gas venting authority expired and bad weather has prevented ARCO from starting pipeline construction. Pipeline construction will begin as soon as possible with ARCO restricting production to 263 BO/month to limit the amount of gas vented to no more than 912 MCF/month. (30 MCFPD)
