²¹ Proposed Casing and Cement Program

Hole Size	Casing Size	Casing weight/foot	Setting Depth	Sacks of Cement	Estimated TOC
12 1/4	9 5/8	36	319	200	Surface
8 3/4	5 1/2	17	8113	Stage 1: 460	6642' CBL
				Stage 2: 417	3924' est @ 60%
				Stage 3: 575	Surface

²² Describe the proposed program. If this application is to DEEPEN or PLUG BACK give the data on the present productive zone and proposed new productive zone. Describe the blowout prevention program, if any. Use additional sheets if necessary.

McElvain Oil & Gas Properties, Inc. proposes to re-enter the plugged and abandoned Wynonna #1 and complete as a Mesa Verde producer. The dry hole marker will be cut off and a casing pup joint will be welded onto the existing 5 1/2" casing and extended to ground level. A 5 1/2" x 7 1/16" 3000# tubing head will be installed on the casing pup and then tested to 3000#. A 50' x 30' pit will be built and anchors set. Six cement plugs will be drilled out and the casing tested to 3000#. The plug back depth will be approximately 5970'. A bond log will be run to determine the cement top above the Mesaverde. Specific intervals between 5603'-5498' of the Mesaverde formation will be perforated and stimulated. If deemed commercial, production facilities will be installed and connected to a gas sales line. A C-102 is attached. Formation tops from previous completion report: Kirtland/Fruitland: 3227', Pictured Cliffs: 3377', Cliff House: 5110', Menefee: 5222', Point Lookout: 5562', Mancos: 5814', Gallup: 6794'.

²³ I hereby certify that the information given above is true and complete to the best of my knowledge and belief.
