UNITED STATES DEPARTMENT OF THE INTERIOR GEOLOGICAL SURVEY

Land Office
Lease No 104-011895
Unit

	SUBSEQUENT REPORT OF WATER SHUT-OFF
NOTICE OF INTENTION TO CHANGE PLANS	SUBSEQUENT REPORT OF SHOOTING OR ACIDIZATO
NOTICE OF INTENTION TO TEST WATER SHUT-OFF	SUBSEQUENT REPORT OF ALTERING CASING.
NOTICE OF INTENTION TO RE-DRILL OR REPAIR WELL.	SUBSEQUENT REPORT OF RE-DRILLING OR REPAIR 1197
NOTICE OF INTENTION TO SHOOT OR ACIDIZE	SUBSEQUENT REPORT OF ABANDONMENT
NOTICE OF INTENTION TO PULL OR ALTER CASING	SUPPLEMENTARY WELL HISTORY
NOTICE OF INTENTION TO ABANDON WELL	Million Courte dant 10
(INDICATE ABOVE BY CHEC	CK MARK NATURE OF REPORT, NOTICE, OR OTHER DATA)
Princo Otero Federal	September 9,, 19.57.
ell No. 12 is located 990 f	t. from $\{S\}$ line and $\{S\}$ line of sec. $\{S\}$
(½ Sec. and Sec. No.) ATWP.)	(Range) (Meridian)
Otero Pictored Cliff 24 Rio A	irriba New Merida
(Field)	(County or Subdivision) (State or Territory)

e elevation of the control of above	sea level is
I	DETAILS OF WORK
ate names of and expected depths to objective sands;	show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cement-
	,,,,,,,,,
ing points,	and all other important proposed work)
	and all other important proposed work)
It is proposed to drill with	rotary tools to a depth of 150+ feet, set 9-5/8"
It is proposed to drill with g to surface with 100 sax, plu	rotary tools to a depth of 150+ fact, set 9-5/8" as or miras. It is then proposed to drill through
It is proposed to drill with g to surface with 100 sex, plu istured Cliff furnation, run o	rotary tools to a depth of 150+ fact, set 9-5/8" as or minus. It is then proposed to drill through electric log and run 5-1/2" production casing. It
It is proposed to drill with g to surface with 100 sax, plu istured Cliff furnation, run o on proposed to gun perforate 5	rotary tools to a depth of 150+ fact, set 9-5/8" as or miras. It is then proposed to drill through
It is proposed to drill with g to surface with 100 sax, pla istured Chiff furnation, run o an proposed to gan perforate 5 o stimulate the producing sees	rotary tools to a depth of 150+ feet, set 9-5/8" as or minus. It is then proposed to drill through electric log and run 5-1/2" production cosing. It 5-1/2" casing opposite the Pictured Cliff formation with a sendwater frac. The proposed drilling
It is proposed to drill with g to surface with 100 sax, pla istured Cliff furnation, run o an proposed to gan perforate 5 o stimulate the producing same	rotary tools to a depth of 150+ feet, set 9-5/8" as or minus. It is then proposed to drill through electric log and run 5-1/2" production cosing. It 5-1/2" casing opposite the Pictured Cliff formation with a sendwater frac. The proposed drilling
It is proposed to drill with g to surface with 100 sex, pla istured Chiff formation, run o en proposed to gun perforate 5 to stimulate the producing sees	rotary tools to a depth of 150+ feet, set 9-5/8" as or minus. It is then proposed to drill through electric log and run 5-1/2" production cosing. It 5-1/2" casing opposite the Pictured Cliff formation with a sendwater frac. The proposed drilling
It is proposed to drill with g to surface with 100 sax, plus distured Chiff furnation, run of man proposed to gam perforate 5 to stimulate the producing same	rotary tools to a depth of 150+ feet, set 9-5/8" as or minus. It is then proposed to drill through electric log and run 5-1/2" production cosing. It 5-1/2" casing opposite the Pictured Cliff formation with a sendwater frac. The proposed drilling
It is proposed to drill with g to surface with 100 sex, pla istured Chiff formation, run o en proposed to gun perforate 5 to stimulate the producing sees	rotary tools to a depth of 150+ feet, set 9-5/8" as or minus. It is then proposed to drill through electric log and run 5-1/2" production cosing. It 5-1/2" casing opposite the Pictured Cliff formation with a sendwater frac. The proposed drilling
It is proposed to drill with g to surface with 100 sex, pla istured Chiff furnation, run o on proposed to gas perforate 5 o stimulate the producing sees	rotary tools to a depth of 150+ feet, set 9-5/8" as or minus. It is then proposed to drill through electric log and run 5-1/2" production cosing. It 5-1/2" casing opposite the Pictured Cliff formation with a sendwater frac. The proposed drilling
It is proposed to drill with g to surface with 100 sex, plu istured Cliff formation, run o en proposed to gan perforate 5 o stimulate the producing sens	rotary tools to a depth of 150+ feet, set 9-5/8" as or minus. It is then proposed to drill through electric log and run 5-1/2" production cosing. It 5-1/2" casing opposite the Pictured Cliff formation with a sendwater frac. The proposed drilling
It is proposed to drill with g to surface with 100 sax, pla istured Cliff furnation, run o an proposed to gam perferate 5 o stimulate the producing same is the SW; of Section 14 (160	rotary tools to a depth of 150+ feet, set 9-5/8" as or minus. It is then proposed to drill through electric log and run 5-1/2" production cooling. It is the Pictured Cliff formation with a sendwater frac. The proposed drilling acres.)
It is proposed to drill with g to surface with 100 sax, pla istured Cliff furnation, run o an proposed to gam perferate 5 o stimulate the producing same is the SW of Section 14 (160	rotary tools to a depth of 150+ feet, set 9-5/8" as or minus. It is then proposed to drill through electric log and run 5-1/2" production cosing. It is the Pictured Cliff formation with a sendenter free. The proposed drilling acres.)
It is proposed to drill with g to surface with 100 sax, planticused Cliff formation, run on proposed to gun perforate ? to stimulate the producing same is the SW of Section 1A (160)	rotary tools to a depth of 150+ feet, set 9-5/8" as or minus. It is then proposed to drill through electric log and run 5-1/2" production cooling. It is the Pictured Cliff formation with a sendwater frac. The proposed drilling acres.)
It is proposed to drill with ig to surface with 100 sax, planticular cliff formation, run of the proposed to gue perforate ? to stimulate the producing same is the SW of Section 14 (160). I understand that this plan of work must receive appropriate the producing same is the SW of Section 14 (160).	rotary tools to a depth of 150+ feet, set 9-5/8" as or minus. It is then proposed to drill through electric log and run 5-1/2" production cooling. It is the Pictured Cliff formation with a sendwater frac. The proposed drilling acres.)
It is proposed to drill with g to surface with 100 sax, plus is tweed Cliff formation, run on proposed to gun perforate ? o stimulate the producing same is the SW of Section 14 (160)	rotary tools to a depth of 150+ feet, set 9-5/8" as or minus. It is then proposed to drill through electric log and run 5-1/2" production cooling. It is the Pictured Cliff formation with a sendwater frac. The proposed drilling acres.)
It is proposed to drill with g to surface with 100 sax, plus is tured Cliff furnation, run on proposed to gas perferate 5 o stimulate the producing same is the SW of Section 14 (160). I understand that this plan of work must receive appropriate the producing same is the SW of Section 14 (160).	rotary tools to a depth of 150+ feet, set 9-5/8" as or minus. It is then proposed to drill through electric log and run 5-1/2" production cooling. It is the Pictured Cliff formation with a sendwater frac. The proposed drilling acres.)
It is proposed to drill with g to surface with 100 sax, plus is tured Cliff furnation, run on proposed to gas perferate 5 o stimulate the producing same is the SW of Section 14 (160). I understand that this plan of work must receive appropriate the producing same is the SW of Section 14 (160).	rotary tools to a depth of 150+ feet, set 9-5/8" as or minus. It is then proposed to drill through electric log and run 5-1/2" production cooling. It is the Pictured Cliff formation with a sendwater frac. The proposed drilling acres.)
