3. Place 100' cement plug at point where casing is parted.
4. As casing is pulled place cement plug through Pictured Cliff Zone 1640-1815'.
5. Place 100' plug from 252 to 352'.
6. Plug top of surface pipe w/cement and install marker.
7. Restore surface.

Last Production placed March, 1959. Give approval in writing by the Geological Survey before operations may be commenced.
