The elevation of the derrick floor above sea level is _____ ft. G.L. Elevation - 6968 ungraded

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

The above described well will be drilled to approximately 5500 feet to test the Gallup Sand. Surface pipe will consist of 300 feet, 10-3/4" H-40, 32.75# and cement will be circulated to the surface. If oil or gas in commercial quantities is discovered, 5-1/2" J-55, 15.5# casing will be set through the pay and it will be cemented with approximately 250 sacks.

I understand that this plan of work must receive approval in writing by the Geological Survey before operation may begin.
