Harry L. Bigbee  
PO Box 669  
Santa Fe, New Mexico 87501

Dear Mr. Bigbee,

We have received form C-104 today for your Nancy #3 well in the NW of Section 12, Township 24N, Range 8W which has been drilled deeper and re-completed in what you have referred to as "Undesignated Graneros". As the Graneros formation is included within the vertical limits of the Dakota formation by the Commission, we are changing the pool designation to Undesignated Dakota.

I am also enclosing a supply of form C-102 for refiling to correct the acreage dedication from 80 acres which the well has had as a Escrito Gallup well, to 40 acres which is the spacing for undesignated oil wells. Please complete and return three copies of the plat. (Surveyors signature not required).

We will also need a tabulation of deviations survey from the old total depth to the new total depth before approving form C-104.

We also note that you have not listed formation tops on the well record form submitted. Will you please send us this information so we may attach it.

Thank you.

Yours very truly,

Emery C. Arnold
